

## **Formats on the Supplied Disk for Embedding and Options for other formats**

The disc as normally supplied contains the documentary in two different codecs which are commonly used for streaming video. (1080p.mp4 at 60fps at an average bitrate of 11Mbps and 720p.mp4 at 60fps at a bit rate of 4.5 Mbps).

If your network requires a different codec please request before purchase and we will let you know if we can provide the desired codec. Or the institution is free to transcode the file. The same limitations and protections that apply to the original disk will apply to the transcoded file. Bear in mind that we will be transcoding from a higher quality original.

If you are requesting that we supply a different transcoding of the video file, please specify the following;

- The desired codec. We can supply in MPEG4, MPEG 2, H 264 or Quicktime
- The desired frame rate
- The desired audio format: AAC, dolby or MPEG
- The desired bit rate

Before purchasing, please email your request to [bill@mayafaces.com](mailto:bill@mayafaces.com)

We will reply to let you know if we can transcode to your format. There is no extra charge for a one-time transcode.
